Subject: Residential Well Water Data -- House Street Area Area
[ATT00001.txt](#)
[01-Shapefile_List.txt](#)
[PFAS_dw_House.xlsx](#)

Please reply to this email message to confirm your receipt of the message and the attachments described herein.

Tom,

This is the first of four (4) email messages to which I am attaching requested documentation of analytical results from sampling of residential wells in designated areas. This initial message is transmitting well water data for residences in the area of the House Street Site. I will shortly be forwarding similar files for the following additional areas under evaluation:

- □□□□□□ Rezen Area
- □□□□□□ Wolven and Jewell Area
- □□□□□□ Ramsdell Area

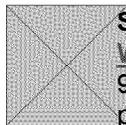

The attached files contain well water data received by Wolverine through Friday, December 15. The data is presented in two formats. The first attachment is an Excel file, consistent with Request #11 of the 104(e) information request. The second file is in GIS Shape file format. It contains the same data as the Excel spreadsheets but also includes a map. As discussed, Wolverine believes the GIS format may facilitate EPA's review of these areas. Accordingly, we are voluntarily providing the additional materials, which are not required under the 104(e) request, as a gesture of cooperation and good faith.

Also attached to this message is a text file that briefly describes the contents of the GIS Shape files for House Street and the other three areas listed above. This text file will not be included with the emails to follow.

These files will also be included with our response to the 104(e) request.

The GIS Shape files require a GIS license to access. Between EPA and its contractors named on yesterday's conference call, we are confident EPA will be able to access the GIS files. If you have any questions in this regard, please let me know.

Scott
